Marshall & Ilsley Banking on Siemens & Communications Systems Management

One of the premier banking institutions in the United States, Marshall & Ilsley (known as M&I Bank) has chosen CSM and Siemens to replace the multiple legacy systems that are currently in place in Florida. Founded in 1847, M&I has locations in Wisconsin, Florida, Arizona, Minnesota, Kansas, Missouri, Oklahoma, and Nevada.

The plan is to replace all the systems over the next three quarters. Siemens has already installed a HiPath 4000 system at the bank's corporate headquarters in Milwaukee and installed multiple HiPath 3000 series at other branch locations. Next on the plan is Florida, where M&I has recently purchased the former Gold Bank. The Florida headquarters will be installing a HiPath 3800 at the main Bradenton, Florida location and installing multiple HiPath 3550 at the branches.

Siemens is well known in the financial services arena with customers such as:

AG Edwards, Deutsche Bank, Zurich Argentina, Eastern Bank, Community Bank, New York Board of Trade, and many localized community banks & Credit Unions

One local community bank describes the relationship between Siemens, CSM, and their financial customers-

"All of our needs for features that are unique to our industry were addressed. CSM & Siemens have addressed all these needs and designed a system that fits our specific situation."

Stephanie Crosley, CFO Nature Coast Bank
