Digital NEC SL2100 telephones

The old Toshiba Strata phone system was having continuing issues indicating a problem in the processor. With support difficult to receive, Cacciatore Brothers decided the time had come to replace the telephone system. After considering multiple vendors and products, the team settled on a NEC SL2100 premise telephone system from CSM South.

New NEC SL2100 telephones were deployed in each department and additional features were enabled to enhance the operations of the store including:

- Paging over the telephones
- Open mic to offices
- Music on hold
- After hours auto attendant
