

Tru by Hilton Bradenton I-75

Known for its vibrant, youthful appearance and style, the Tru brand by Hilton is one of the fastest growing hotel flags in the industry. This brand ethos, coupled with the explosive growth in southwest Florida, is sure to lead to a rocking success for the all new Tru by Hilton Bradenton I-75

As a new location, this was a greenfield opportunity with all new infrastructure. That made deployment of the PhoneSuite Voiceware telephone system a breeze. Analog phones were chosen for the hotel rooms while slick new V-Tech 736 telephones were installed in the office spaces and front desk.

The PhoneSuite Voiceware telephone system includes a full suite of hospitality features including:

- SIP VoIP telephones for office and front desk
- Analog telephones for guest rooms and common areas
- Music on hold
- Auto attendant and voice mail
- PC and MAC software for accomplishing every hospitality function imaginable including wake up, check in/ out, welcome message, etc.

CSM is proud to be a part of the success of the new Tru by Hilton Bradenton I-75 and looks forward to additional work installing new telephone systems in the southwest Florida area.
